

# Malaysian Bungalow

## Project Overview

**Project:** MAG 5 @ Grandville  
USJ 1

**Location:** Petaling Jaya,  
Selangor, Malaysia

**Clients:** a couple with their  
three children ages 17, 15, and  
10.

**Area:** Gross build up  
approximately 6,500 sq ft.

## Concept Statement

The design for this home will be very open with natural elements incorporated inside and outside. The lower level of the house will have enclosed spaces on the perimeter of the house. The glass atrium and open stairs will allow sun through and make the space flow. Storage will be incorporated to accommodate the family's recreational equipment such as bicycles, and sport supplies. On the first all bedrooms will have closet space and an attached bathroom. The First level will also have a family room for everyone to use together. Overall the materials and colors used will be organic and mirror natural elements
