

# MALAYSIAN BUNGALOW

Designed by: Kate Ioerger

## Project Overview:

Located in Petaling Jaya, Selangor, Malaysia Mag 5 at Grandville is an approximately 6,500 sq./ft. home built by Favourite Outcome SDN. BHD. The home is currently occupied by a couple and their three young children along with their live in maid. The home is not meeting the needs of this family. Both kitchens are too small and a few of the rooms have odd placement. The wishes of these clients' are to renovate the home and add more function while creating an aesthetically pleasing space with modern Balinese style.

## Concept statement:

With the combination of clean lines and organic elements, I have created a modern Balinese style home. The use of natural light has been taken advantage of in every aspect of the home due to the vast amount of windows. In rooms which lacked a lot of natural light, organic touches were added to help the space feel in touch with the surrounding environment. Spaces are arranged in an easy flowing manner throughout the home and enables certain features to become focal points. There is a strong connection of materials and design throughout the home that truly tie the space together. This home provides this family of five with a home that is aesthetically pleasing, functional, and acts as a spacious environment the whole family to entertain and live.
