

MALAYSIAN BUNGALOW

BY: SYDNEY RICHARDSON-FORREST

PROJECT OVERVIEW

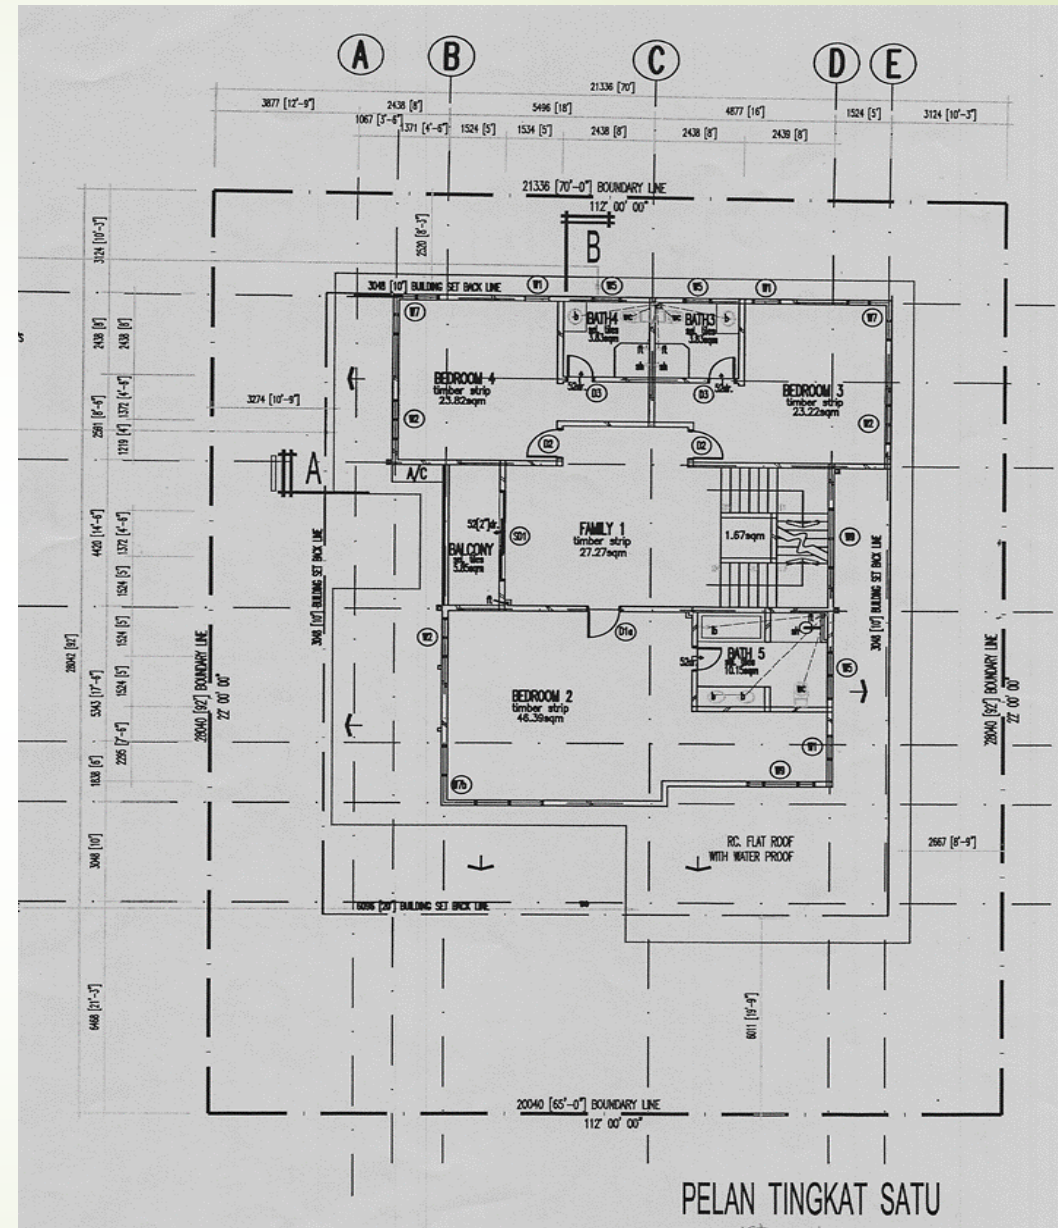

- ▶ The client that I'm designing for is a couple that has three children ages a boy 17 years old, a girl 15 years old, and a boy 10 years old. Also the family has a live-in maid. Occasional the children's grandparents comes to visit them. The Malaysian bungalow is 6,500 sq. ft., and located Petaling Jaya, Selangor, Malaysia. This Malaysian bungalow consist of 3 floors.

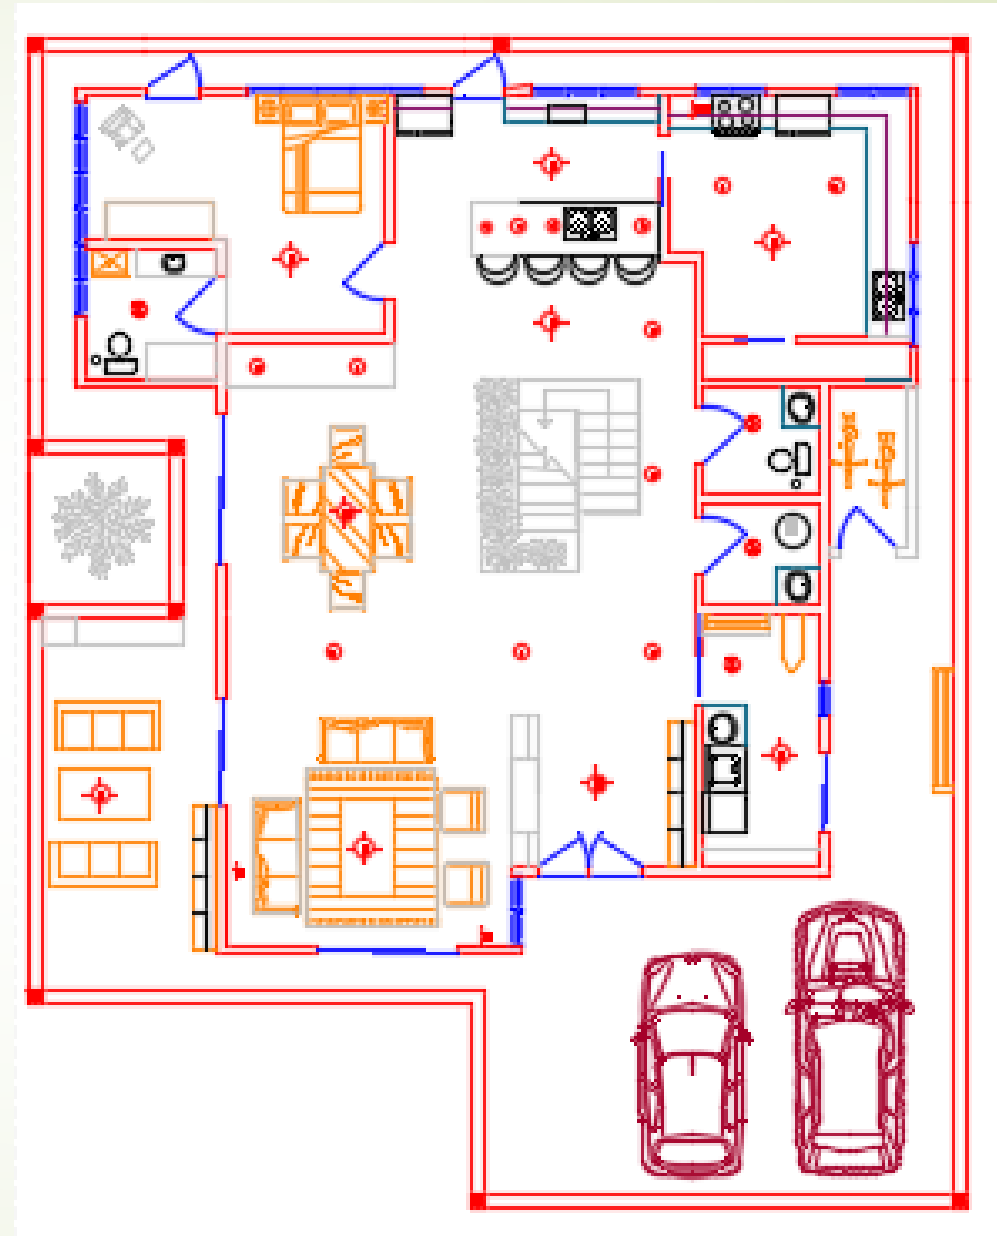

CONCEPT STATEMENT

- ▶ The concept of designing the Malaysian bungalow for my clients was to have a space where the family could feel relaxed, modern and a home where the family could connect to nature. I have done this by having a soft green paint color in the dining room, while having an glass atrium with bamboo and plants placed within the glass wall. Also I added a wooden staircase that would help bring the nature from the outdoors inside the home. When it can to add a modern theme to the space I added marble tile floors throughout the space to make the space feel bigger. I added a herringbone pattern on the kitchen wall to provide a different texture within the space, kitchen cabinets that were modern and added modern chairs in the kitchen and the dining room area. By adding these pieced into the space allows the clients to have a space where they can feel relaxed, add a modern feel to the space and connect with nature.
