Concept statement

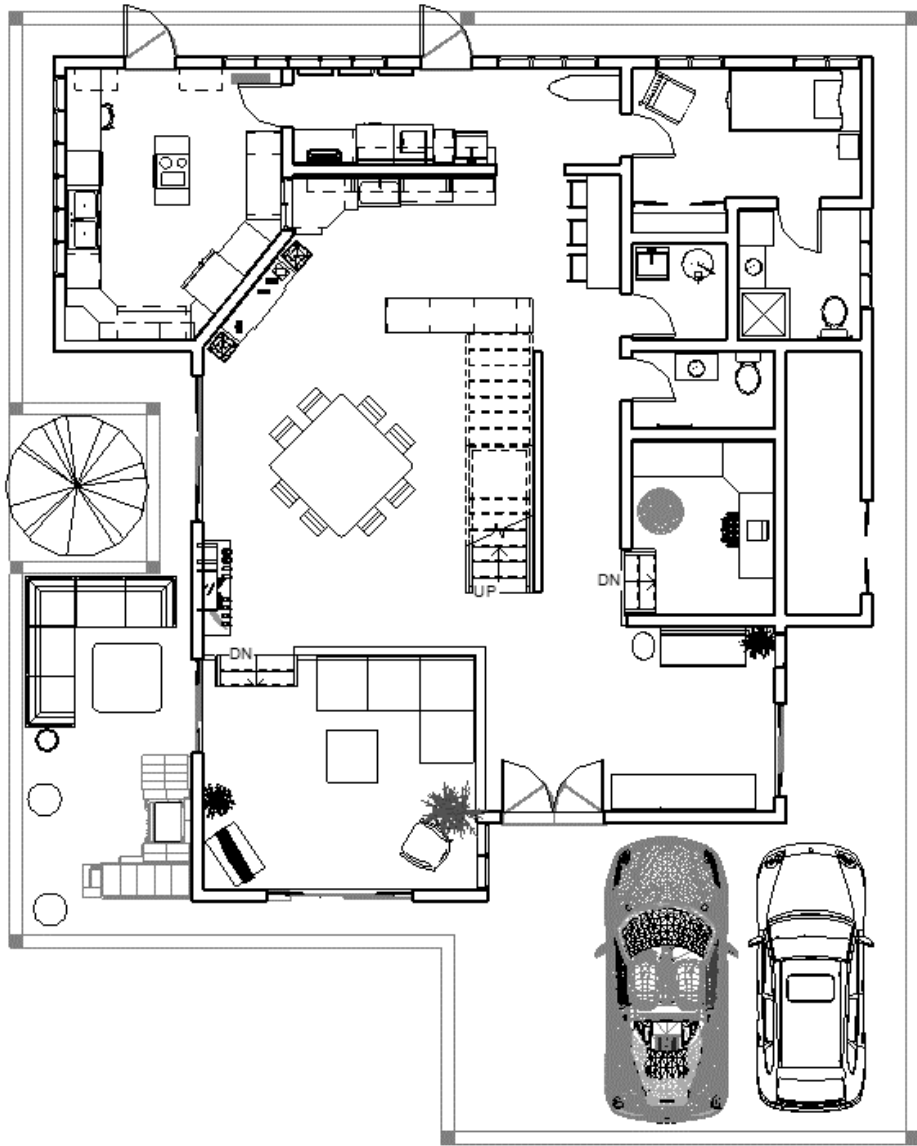

To create the ideal space that the client has in mind, a connection to nature and the modern Balinese style will be incorporated into the new design. Also there will be a welcoming entry way along with plenty of space to entertain guest and spend quality time together as a family. A much needed upgrade to the wet and dry kitchen will improve the quality of living for the family. A drop down floor into the living room helps create a cozy space get away. Bedrooms will be appropriately spaced upstairs so that the whole family will be able to utilize the balcony and the family room. Because of these changes made, the space will be more effective and appealing to the client.
